## Technical Skills

---

**Programming Languages :** Python, Django Framework, HTML, CSS, Tailwind CSS, JavaScript, SQL, MongoDB

**OOP's Concepts :** Object Oriented Programming

**Tools and Software :** Visual Studio, MySQL, PyCharm

**Interpersonal Skills :** Communication, Problem-Solving, Adaptability, Team Collaboration, Creativity.

## Project's

---

### 1. Quick Task ( Home Services Platform)

**Tech Stack:** MERN (MongoDB, Express.js, React.js, Node.js)

October2025--present

- Built a comprehensive home services platform enabling users to book various home services from verified service providers.
- Developed a dual-interface application with separate user and service provider dashboards for seamless task management.
- Created RESTful APIs using Node.js and Express.js for user authentication, service listings, booking management, and payments.
- Implemented MongoDB database to store user profiles, service provider information, service categories, and booking history.

### 2. Personal Portfolio Website

**Tech Stack:** React.js, HTML, CSS, Supa base |

jun2025--dec-2025

- Developed a professional portfolio website showcasing personal information, skills, and project portfolio.
- Built interactive React.js components with smooth animations and transitions for engaging user experience.
- Utilized Supa base as backend database for storing Form data.
- Designed responsive, mobile-friendly layout that adapts seamlessly across all devices and screen sizes.

### 3. Django Blogging Web Application

October2025--

present

• Tech Stack: Python, Django Framework, HTML, CSS, Tailwind CSS, SQL      Jan 2024 – Mar 2024

• Developed a full-stack blogging platform using Django that allows users to create, edit, publish, and delete blog posts.

• Implemented user authentication (signup, login, logout), role-based access, and category-wise blog management with a responsive UI.

## Education

---
